#### PRICE LEGEND

**(NC):** procedures **with no charge** for the insured party.

\* Anaesthesia included in animals up to 40 kg.

#### INFORMATIVE NOTES

**1. All emergencies must be coordinated through [www.segurcaixaadeslas.es](http://www.segurcaixaadeslas.es)**

A life-threatening emergency is an unexpected and serious medical situation that affects a pet and requires immediate veterinary attention. This situation must be resolved immediately, and cannot wait to be treated during a veterinary consultation by appointment because it critically endangers the animal's life.

**2.** All operations carried out as emergencies will incur a **25% surcharge** on the basic rate.

**3.** In the prices for treatment, serums, medicines, prostheses and orthoses are **not included**, nor are pins, meshes, plates, cerclage or the resuscitation of newborns, where necessary.

**4.** In communities where vaccination is compulsory, the costs of the paperwork will be charged at the private cost set by the veterinary clinic the insured party has used.

**5.** There is a possibility that not all the procedures related with the price are performed in all the clinics within the network. Check availability.

**6.** The specialist consultation only applies to those families specified in the price.

**7.** Daytime hospital admissions depend on the opening hours of each centre.

**8.** For all other procedures not included in this schedule, the private rate of the veterinary clinic shall apply.
